In addition, it is available as part of the Autodesk Architectural Desktop family, which includes AutoCAD Architecture, AutoCAD MEP, AutoCAD Electrical, AutoCAD Mechanical, AutoCAD Land Surveying, and AutoCAD Civil 3D. And I'm using the latest (16.1) version of AutoCAD: Post navigation The first of the Ian Fleming Re-Created Bond Spectre Killers... The 6th James Bond film has just hit cinema screens and the world is going crazy for it. Today, I've spent the day getting all the James Bond TV Series episodes that I've missed up on my DVR. But, during my tv viewing, I must admit to a bit of confusion over why I've so enjoyed seeing the character of Eve Money Penny once again. During the 60's, the world changed dramatically and created a change in the 007 character. Money Penny (a journalist and secretary) disappeared for some time, only to reappear in On Her Majesty's Secret Service (1969), and then not reappear until the 25th James Bond Film. (No, I'm not going to go through the SPECTRE connection for this article, but I did do a feature on this here a while back). Money Penny isn't a MI6 agent, or works in intelligence, she's a secretary. She makes a temporary return to the series in this film and then a permanent return in 1974's Live And Let Die, when she returns as a strong bond support character and is the person who helps Bond to find Dr. Garmara, an alias of Irma Bunt. So what is the point of a re-created character in a re-created film? If you're a fan of the series, I can see the appeal, but what if you're not? Is this some sign that the current production team at the helm of the 007 franchise are pulling out all the stops to bring the audience that'
