Technical team 

 Ask us

*The difference between CGM and BGM is similar to that of a regular camera and surveillance camera.*

A regular camera takes accurate, high-resolution snapshots, does not record the past, cannot predict the future, and requires effort to produce it. On the other hand, a security camera creates lower focused frames, retrieves the history (for further analysis), predicts the future, and is the most significant feature that can alarm in predefined critical events [\[Klonoff, D. C. 2005.\]](#)

## First Patch Insulin Pump

...game changer to Continuous Insulin Delivery !

## Equil Patch Insulin Pump

**\$4,100.00**

Adhesive, tubeless & light-weight continuous insulin delivery pump that features wireless connection (Bluetooth) to a personal diabetes assistant (PDA) controller.  Ask us

The patch pump has the same size as a matchbox, weighs 23 grams and overall measures 59,5x40mm. An integral self-adhesive pad attaches the device to the body, and the cannula delivers insulin directly from the 200U onboard reservoir. As a result, tubes and wires are no longer required to connect & control the reservoir unit.

Full training program: Pump use, special cases, and carb counting are included in the price. To learn more, visit [Equil Academy](#).

Dedicated support line: For pump users through an authorized diabetes educator
